An Open House on the Albany Terminal Air Permit

Tuesday, February 25 6:00pm - 8:00pm

Ezra Prentice Homes Community Room 625 South Pearl Street Albany, NY 12202

Dear Neighbor,

Global Partners is moving ahead with the process of renewing our air permit for our Albany Terminal, As part of the permit renewal modification, we are proposing some changes in the way the terminal is operated.

These changes have been influenced by what we have heard from the community previously. They include a proposed decrease of more than 75% in the amount of crude oil allowed to be shipped through the terminal. The proposed changes are summarized in this brochure.

A permit renewal modification will be submitted to the New York State Department of Environmental Conservation (NYSDEC) in March, However, the public process with opportunities for further input begins now.

We are hosting an Open House on February 25 so you can learn more, ask questions, and share your views. We hope to see you there.

Dylan Remley

Senior Vice President of Terminal Operations

What changes are being proposed?

Global's Albany Terminal operates under a Title V air permit from the New York State Department of Environmental Conservation. In March, Global plans to submit a permit renewal modification to the NYSDEC. It will include some voluntary changes that have been influenced by previous community input.

Key changes include:

- · Decreasing the allowable amount of crude oil to be shipped through the terminal by over 75%.
- Installing enhanced controls to more effectively treat emissions from our loading operations.
- Expanding the types of biofuels handled at the terminal to help meet New York's renewable energy requirements and greenhouse gas reduction initiatives.
- Installing natural-gas fired boilers needed to receive, store, and ship certain biofuels. No other products will be heated.
- · Adding flexibility to respond to changes in the market and improve service to our customers.

About the Albany Terminal

Global Albany is a hub for the safe delivery, storage, and distribution of energy products. The terminal helps fuel homes, vehicles, and the local economy.

- · The terminal handles a variety of products, including gasoline, diesel fuel, home heating oil, kerosene, and renewable fuels such as ethanol and bio-based diesel.
- · Global purchased the Albany Terminal from ExxonMobil in 2007. Since then, we've invested more than \$30 million in upgrades.
- Since 2013 the Albany Terminal has undergone more than 400 inspections by state and federal agencies with no major

As a third-generation, family-run company, Global Partners is committed to working safely and reliably with communities and regulators everywhere we do business.
